

protective divider made of acrylic glass

Protect yourself from droplet infection from saliva or droplets of mucus from speaking, coughing or sneezing with the modular divider made of acrylic glass. The divider can be used individually or modular in combination.

CA-0521-66X75
divider 66x75cm
€109,- w/o taxes, w/o shipping

Scope of delivery of divider:

2 x standing feet
(314x112x3mm each)

1 x divider
with opening: 320x117mm
(664x750x3mm)

3 x lengths of nylon thread
(around 10cm each)

Assembly:

1. Remove protective film of feet and divider on both sides.
2. Stick standing feet in divider.

[Optional] Combine multiple dividers with nylon thread.

shown: connection of two dividers using nylon thread

Example: individually in the office

The divider can be used flexibly.

It was designed for both single and modular use and is suitable for e.g.:

offices, counters,
meeting rooms, etc.

There are three holes on each side. This allows several divider walls to be connected or fixed with the nylon threads supplied.

Example: three dividers combined

BY THE WAY:

The design and dimensions of this divider were chosen so that they are particularly **resource-saving** and **minimize waste**.

Left: Connection of two dividers by nylon thread

Right: supplied nylon threads

Thanks to the flexible connection, several partition walls can be arranged at any angle.

Extreme angles are possible by removing one or more feet, but are not recommended.

Cleaning instructions:

Please note that the divider must never be cleaned with nitro thinner or alcohol as this would cause damage.

Please only use the cleaners recommended by us:

- Acrylic glass care and cleaning agents (available from us)
- various dishwashing detergents

You can get the right cleaning agent from us at:

office@pomberger.com

Example: combined in the meeting room
